

WHY IS HPL THE RIGHT SURFACE FOR YOU?

Provides greater design flexibility.

When you consider that HPL can be used in either high- or low-touch applications, then you combine that with an industry leading design offering, it is clear to see why HPL provides you with the highest degree of design and application flexibility.

Helps achieve a lower cost of ownership.

HPL can provide better long-term design integrity, lower day-to-day maintenance costs, and greater long-term value for a much lower cost of ownership overall.

Innovative.

HPL is available with a variety of different innovative solutions such as AEON™ Enhanced Scratch & Scuff-Resistant Performance Technology, Antimicrobial Protection, and specialty applications such as High Wear, Traceless™, Chemical-Resistant, and Fire-Rated Laminates.

Superior durability.

High-touch applications demand the durability and performance only HPL can deliver.

24X **Wear Resistance**
HPL surfaces with AEON™ Technology are dramatically more durable compared to TFL.

5X **Scuff Resistance**
Much more resistant to scuff damage than TFL, HPL stands up against day-to-day use.

3X **Impact Resistance**
With impact resistance superior to TFL, you can have confidence in your surfaces.
